DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-4, 7 and 29-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Anderson et al.

Anderson et al discloses a multi-optical receptacle assembly comprising at least two optical receptacles (see figure 1), the at least two optical receptacles being arranged longitudinally with respect to each other and having a shared wall (160) extending transversely between adjacent optical receptacle of the at least two optical receptacles of the at least two optical receptacles, two optical receptacles, four optical receptacles, more than four optical receptacles, unitary shared wall, connecting means, a mounting means, unibody construction (50).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson et al.

Anderson et al discloses all the limitations of claim 1 as shown above, Anderson et al also discloses the shared wall comprise a unitary shared wall.

However, Anderson et al does not disclose:

- a) the shared wall has a thickness of 0.001 inch to 0.15 inch. It would have been an obvious matter of design choice for Anderson et al to have the shared wall has a thickness of 0.001 inch to 0.15 inch, since such a modification would have involved a mere change in the size of a component. A change in size or shape is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

Note: According to the specification page 25, lines 11 and 12, a thickness of 0.001 inch to 0.15 inch is a **matter of preferences** by the applicant.

Art Unit: 2839

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 6412986 (shared wall and unibody), US 5613025 (14, unibody) and US 5293581 (35, unibody).
